**HD Foldable Pocket Drone**

1. Top Cover
2. Blade
3. LED Light
4. Camera
5. Power Switch
6. Battery

**IMPORTANT SAFETY INFORMATION**

**CAUTION:** AVOID FLYING DRONE IN CROWDED AREAS.

**WARNING:** NOT SUITABLE FOR CHILDREN. ROTATING BLADES MAY CAUSE INJURY.

**Important Instructions Before Use**

1. Only use device for intended purposes.
2. Fly drone in area without low barriers or crowds of people.
3. Review rules and regulations for flying drones in your area.
4. Ensure all propellers are secure.

**Pre-Flight Preparation**

1. Propeller Installation
   - Propellers should be installed by pairing them with their corresponding leg. Please see the diagram on the right for details. Failure to install propellers correctly may impact drone performance. To install and uninstall propellers, use the included screwdriver.

2. Aim Holding Order
   - When starting, fold the front arms (near the camera) first.

3. Lithium Battery Instructions
   - Place the battery from both sides and pull out the entire battery assembly. To charge, plug the USB cable into a power source and the red cable into the battery.

**App Instructions**

Download Drone App on Your Smart Device

1. Scan QR code for your Android (Google Play) or iOS (App Store) device.

Before use, place the drone on the flat ground. Turn on your Wi-Fi and connect to WiFi-720P-###.

Open the app and enter main interface, then click “play” to enter the main app.

Click icon "" to enable the controls.

Click icon "" to activate altitude hold.

**Pre-Flight Preparation**

1. Arm Folding Order
   - When storing, fold the front arms (near the camera) in first.

2. Lithium Battery Instructions
   - Grip the battery from both sides and pull out the entire battery assembly. To charge, plug the USB cable into a power source and the red cable into the battery.

Hardware Manual

1. Gravity Sensor Mode: Use this feature to control your drone by shaking your phone.
2. Take Pictures/videos:
   a. Position the drone to face forward.
   b. Click on the camera button or video button to capture photos/videos. Click video button again to stop recording.

Tips for Operating/Your Drone

Attention: After flight, please disconnect the battery from the drone to avoid battery damage.

1. After charging, connect the battery with the drone. Place the drone on a level surface.
2. Ensure there is enough space to safely fly your drone. Make sure you are aware of which way the drone is pointing before takeoff to ensure easier flying.

Attention: The camera of your drone is the “front”.

Attention: After flight, please disconnect the battery from the drone to avoid battery damage.

a. Indoor flying: Choose a wide place without barriers, pets, people, or items that could be damaged.

b. Outdoor flying: Choose a warm, clear, windless day. Do not fly in extreme temperatures. Flying in extreme temperatures may affect the performance and damage the product.

i. Do not fly in overly windy conditions. The performance and the control of the drone will be affected by the strong winds. Flying in overly windy conditions may damage or destroy the drone, and may cause the drone to fly away.

ii. We recommend flying in a square, trying to go in a cross-shaped pattern, or going in a circle after mastering takeoffs, landings, and basic rotation.

iii. Altitude Hold
   When you release the left joystick after reaching your desired height, the drone will still hover over the height when the joystick was released.

   a. Hold the drone in Altitude Mode.
   b. Position the drone to face forward.
   c. Click on the camera button or video button to capture photos/videos. Click video button again to stop recording.

iv. Take Pictures/Videos:

   a. Push up on the left joystick to ascend, and push down on the joystick to descend.
   b. Push up on the right joystick to fly forward, and push down on the joystick to fly backward.

   a. If the drone flies forward while flying, adjust the fine-tuning to the left until it returns to normal.
   b. If the drone flies backward while flying, adjust the fine-tuning to the right until it returns to normal.

   a. If the drone drifts to the right while flying, adjust the fine-tuning to the left until it returns to normal.
   b. If the drone drifts to the left while flying, adjust the fine-tuning to the right until it returns to normal.

   a. If the drone shows a tendency to ascend while flying, adjust the fine-tuning to the right to normal.
   b. If the drone shows a tendency to descend while flying, adjust the fine-tuning to the left until it returns to normal.

   a. If the drone shows a tendency to turn, push up on the left joystick to ascend, push down on the joystick to descend.
   b. If the drone shows a tendency to turn, push the left joystick to the left for left turn, to right for right turn.

   a. If the drone drifts to the forward while flying, adjust the fine-tuning to the backward until it returns to normal.
   b. If the drone drifts to the backward while flying, adjust the fine-tuning to the forward until it returns to normal.

   a. If the drone shows a tendency to turn to the right while flying, adjust the fine-tuning to the left until it returns to normal.
   b. If the drone shows a tendency to turn to the left while flying, adjust the fine-tuning to the right until it returns to normal.

   a. Fasten the seat belt when flying at low speeds.
   b. When flying at high speeds, use the emergency stop button to stop the drone.

   a. If the drone shows a tendency to turn, push up on the left joystick to ascend, push down on the joystick to descend.
   b. If the drone shows a tendency to turn, push the left joystick to the left for left turn, to right for right turn.

   a. If the drone shows a tendency to turn, push up on the right joystick to fly forward, push down on the joystick to fly backward.
   b. If the drone shows a tendency to turn, push the right joystick to the left for left turn, to right for right turn.

Caring Information

1. If you need cleaning, wipe with a damp cloth. Do not attempt to clean with liquid cleansers or submerge in water.
2. This device complies with the European Standards 2014/53/EU.
3. All end of life processes, like disposal, may not be disposed of in a normal household waste, but rather must be disposed of at a collection point for WEEE.
4. The materials are recyclable according to their labelling. You make an important contribution to protecting our environment by reusing, recycling, or utilizing old devices in other ways.

Table of Specifications

- Dimensions: 250 x 250 x 35 mm
- Weight: 85 g
- Motor type: Coreless motor
- Battery Life: 6-8 minutes
- Motor Material: ABS & Hardware
- Camera: 2MP
- Main Material: Plastic & Iron
- Function: Forward/backward, ascending, descending, left and right, left and right strafe, left and right strafe without rotation, left and right turning, forward and backward turning, photo taking and video recording.
- Supported Operating Systems: Android 4.2 and iOS 7.0 above
